

See the general installation manual for main installation and safety instructions

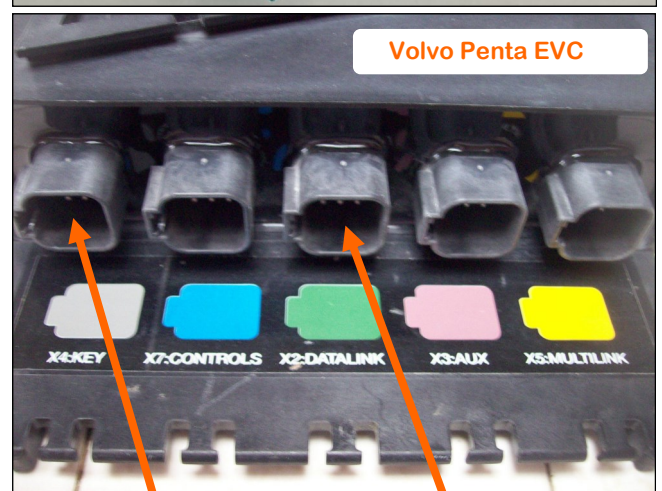

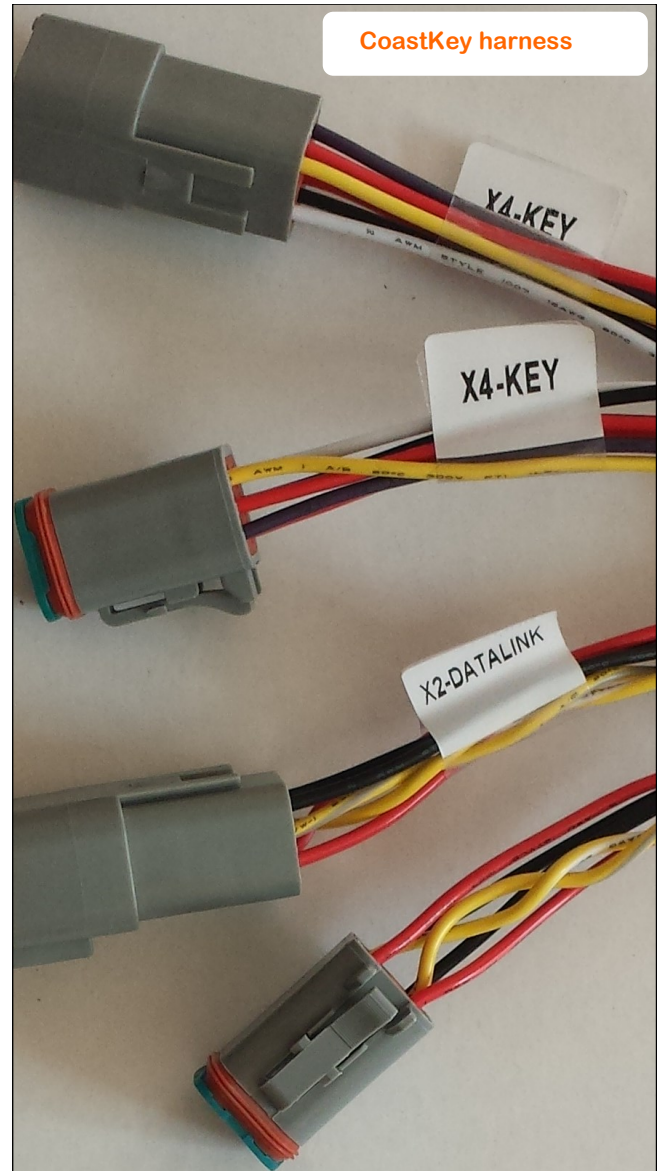

Connect the CoastKey harness according to the following procedure:

In the CoastKey harness there are four 6 pin Deutsch connectors that goes to the Volvo EVC module, and one 8 Pin Deutsch connector. Locate the Volvo EVC module. On Volvo Penta EVC unit you will find a connector labeled X4-KEY (Ref 1)

Disconnect this connector, and connect the male connector marked X4-KEY on the wiring harness from CoastKey in this terminal. The female plug on CoastKey harness labeled X4-KEY goes into the the Volvo Penta socket sitting in X4 KEY Terminal in the EVC module.

X2 DATA LINK connector (Ref 2) is connected in the same way.

Connect the 8 Pin Deutsch connector into the CoastKey engine control unit
