

# START AND STOP WITHOUT KEYS

## AND HAVE COMPLETE FREEDOM OF MOVEMENT

**COASTKEY** is a true keyless ignition system for your boat. Start and stop the engines using a PIN code from the Start Panel. Add a remote control (FOB) that allows remote starting and serves as a wireless engine cut off switch (ECOS).

*"...It's also fantastic to be able to start and stop without keys - from the Start Panel or wirelessly from the FOB."*

DAG OTTO LAURITZEN

*"...We can confidently recommend CoastKey to others who take security seriously and puts heavy demands on equipment installed on board."*

ROY ANDERSEN  
RIB ADVENTURE AS

*"The remote functions of the CoastKey system give our customers tremendous peace of mind, reinforcing all of their great times on the water."*

RYAN PATTERSON  
VEXUS BOATS

*"...It's important that our customers feel safe when boating. We will strongly recommend CoastKey to other boat manufacturers..."*

PETER MINDER  
BOOTWERFT HEINRICH AG

*"... I always wear the Coastkey FOB when fishing and unlike the regular kill-cord it allows for freedom of movement..."*

FRANK RONNY JOHANSEN  
A-TEAM TROLLING

*"...With keyless ignition and remote control that control auxiliary functions we truly move the connection between the driver and the boat into the 21st century..."*

TROND SCHOU  
NOR-TECH BOATS

# SAVES LIVES

Safety is the most important aspect of boating. If the captain falls overboard, it is imperative that the boat stop immediately. Surveys show that, unfortunately, the traditional lanyard switch is rarely used. The main reason given is that it's too inconvenient to be chained to the console, which limits movement onboard the boat.

We believe comfort, freedom and security, all in one product, is the best option!

The CoastKey wireless engine cut off switch (ECOS) gives you, as the captain, freedom of movement and safety by automatically stopping the engines if you fall overboard.

# MADE IN NORWAY

CoastKey was created by a group of experienced Norwegian mariners who have worked continuously since 2005 to improve the comfort and security of boaters.

CoastKey is an industry first mover combining an innovative keyless ignition system and wireless kill switch functionality. Developed and tested to withstand the rough Norwegian sea conditions.

# THIS IS COASTKEY

CoastKey is a keyless ignition system utilizing a personalized PIN code to unlock the Start Panel for starting and stopping all engines.

A FOB can easily be added to give you remote start, as well as additional wireless functionality, including a wireless engine cut off switch (ECOS).

**COASTKEY BASIC** consists of a Start Panel, an Engine Control Unit and a Plug & Play wiring harness. This system allows for keyless start of up to 4 engines. The CoastKey Start Panel replaces the traditional ignition switch and uses a customizable PIN code to start the engines. *No keys necessary!*

**COASTKEY STANDARD** or **COASTKEY PREMIUM** adds a wireless FOB further expanding your CoastKey into a complete remote start/stop system with a wireless engine cut off switch (ECOS).

The 5-button FOB included in the **COASTKEY PREMIUM** system allows for wireless control of additional functions, such as tilt, windlass or lights, etc.

## **BASIC**

WITHOUT FOB

Keyless Ignition  
Start Panel  
Engine Box  
Plug & Play Harness

## **STANDARD**

WITH 2-BUTTON FOB

Keyless Ignition  
Start Panel  
Engine Box  
Plug & Play Harness  
Wireless Kill Switch  
Wireless Start-Stop

## **PREMIUM**

WITH 5-BUTTON FOB

Keyless Ignition  
Start Panel  
Engine Box  
Plug & Play Harness  
Wireless Kill Switch  
Wireless Start-Stop  
Wireless Trim- Tilt or Windlass
